**GREAT British Blades**

# Welcome to Jewel Blade

Jewel Blade is a world-leading manufacturer of high precision blades for industrial and commercial applications. The company has been located in Sheffield, England at the heart of the British steel industry, for over 85 years. We are proud of our long history and unique manufacturing facilities. We display the legendary 'Made in Sheffield' as the mark of quality on our blades. This gives our customers the confidence to select Jewel Blade as a business partner.

The capability and experience of Jewel Blade's design and manufacturing ensures all bespoke and speciality blades are produced within an effective and efficient timescale for the client. Our flexible approach and reliable manufacturing facilities allow us to adapt to specific requests from our customers and the demands of the market sectors. Finest high-grade steels and specialist coatings are available to fulfill customer's specific needs.

Jewel Blade's comprehensive range of products and a customer-focused operation ensures customer's orders are delivered promptly from our stock.

Jewel Blade's Trapezoidal Utility blades are manufactured in Sheffield using high-grade 0.43mm, 0.63mm and 1mm steel (where illustrated). The versatile designs are suited to many industrial and commercial uses, hand held knives and assorted machinery.

Alternative steel, coatings and various packaging options are available to choose from. All ranges are subject to rigorous testing process to ensure they meet the high quality standards that is essential to complete tasks efficiently and effectively.
